Professional Summary

Detail-oriented Computer Science graduate with hands-on experience in software development, web applications, IT support, and systems troubleshooting. Skilled in building user-centered applications, developing automation tools, and supporting backend services. Experienced with JavaScript, Python, SQL, React, Firebase, Git, and modern web technologies. Seeking an entry-level Software Developer, Full Stack Developer, or Application Support role where I can continue growing technically.

Highlights

- Published Chrome extension on the Chrome Web Store
- 2+ years of experience in IT support, software troubleshooting, and systems support
- Experience with JavaScript, Python, SQL, Firebase, React, and Git
- Strong background in full stack development and web applications
- Hands-on experience with automation scripts, APIs, backend systems, and deployments

Technical Skills

Languages: Java, JavaScript, Python, C++, SQL, TypeScript, Unix
Frontend: HTML, CSS, Bootstrap, Angular, React, Next.js, Tailwind CSS
Backend: Node.js, Firebase, REST APIs, SQL-based systems
Tools: Git, GitHub, Docker, Visual Studio Code, Figma, Chrome Extension APIs (Manifest V3)
Concepts: Object-Oriented Programming, Data Structures, Algorithms, Software Testing, UX/UI Design, Responsive Design

Education

Bachelor of Science in Computer Science
Florida Agricultural & Mechanical University (FAMU)
Graduated: August 2024

- Relevant Coursework:
    - Data Structures I & II
    - Algorithms

- Advanced Software Development
- Programming Languages
- Database Systems
- File Structures and Data Structures

Project Experience

Job Application Tracker — Chrome Extension (Published on Chrome Web Store)

Tech: JavaScript, Chrome Extension APIs, HTML, CSS, Chrome Storage API, GitHub Pages

- Designed and developed a productivity-focused Chrome extension using JavaScript and Chrome Extension APIs (Manifest V3)
- Implemented smart autofill from job boards such as Indeed and LinkedIn using content scripts and tab permissions
- Built local data persistence using Chrome Storage API for job tracking, status updates, tags, and reminders
- Developed CSV export functionality for user data portability
- Packaged, validated, and published the extension on the Chrome Web Store
- Structured privacy practices, permissions justifications, and hosted a public privacy policy via GitHub Pages

Hotel Reservation Platform — Lead Full Stack Developer

Tech: JavaScript, Firebase, HTML, CSS, Payment APIs

- Developed a hotel booking platform for reservations and payments
- Integrated real-time database updates using Firebase
- Reduced booking time by 30%, improving customer experience and user satisfaction
- Collaborated with team members to improve application performance and responsiveness

FENDER Mobile Application — Front-End Developer

Tech: JavaScript, HTML, CSS, Responsive Design

- Designed and developed mobile-friendly user interfaces
- Collaborated with designers to improve usability and application flow
- Supported application testing and deployment processes

Connect Ability Web Application — Scrum Master

Tech: Firebase, JavaScript, HTML, CSS, Agile

- Led team development for an accessible networking platform
- Implemented real-time data updates and accessible design features
- Increased user interaction by 25% after launch

- Coordinated project milestones, testing, and communication across the team

Professional Experience

Puttshack — IT Support / Systems & Application Support

Fort Lauderdale, FL | August 2025 – Present

- Supported web-based POS systems and internal applications
- Resolved front-end and back-end system issues across multiple platforms
- Assisted with database updates, monitoring, and troubleshooting
- Collaborated with developers on bug fixes and system improvements
- Documented technical workflows and support procedures

UDT — IT Engineer / Junior Systems Developer

Orlando, FL | August 2024 – August 2025

- Developed and tested internal tools and automation scripts
- Supported backend services, servers, and internal applications
- Implemented patches, upgrades, and system improvements
- Used Git for version control and deployment tracking
- Assisted in deployments and issue resolution across multiple environments

SpectrumX — IT Support Engineer Intern / Technical Developer Intern

Tallahassee, FL | May 2023 – August 2024

- Built Python automation scripts to improve internal workflows
- Maintained dashboards, reporting tools, and support systems
- Supported database processes and backend operations
- Troubleshot application errors and system issues
- Documented technical solutions for future support use
